

iCLEAN

Maintaining consistently high cleaning and hygiene standards across NZDF's diverse estate is operationally complex, particularly where accommodation occupancy, training tempo, and operational activity fluctuate daily. iClean is a digital, task: based Cleaning Management System that modernises NZDF cleaning operations by replacing static schedules and paper based records with real time, data driven task allocation, verification, and reporting.

Using mobile devices or tablets, cleaning staff receive dynamic cleaning tasks aligned to actual room usage, occupancy status, and operational priority. Tasks are completed with time stamped records, photographic verification, and automated escalation of defects or incidents. This provides NZDF with auditable evidence of cleaning standards, improved resource utilisation, and a consistent, Defence grade hygiene framework across all camps and bases.

Benefits to NZDF

1

PROVIDES EVIDENCE-BASED CLEANING ASSURANCE –

Delivers verifiable records for audit and compliance.

2

ALIGNS CLEANING WITH OPERATIONAL DEMAND –

Adjusts tasks based on actual usage and need.

3

IMPROVES CONSISTENCY OF STANDARDS –

Standardised workflows ensure uniform outcomes.

4

ENABLES RAPID ISSUE

IDENTIFICATION – Captures and escalates defects in real time.

5

OPTIMISES WORKFORCE

DEPLOYMENT – Reduces supervision and improves efficiency.
