

KEYLESS ENTRY

NZDF accommodation operations currently rely on over six thousand physical keys creating administrative burden, security risk, and delays, particularly during high volume postings, exercises, and surge activity. A Keyless Entry System modernises accommodation access by replacing physical keys with secure, digital access controlled through smart locks and authorised credentials such as access cards or future Defence Life App integration.

This system enables NZDF to manage accommodation access digitally, improving security, reducing lost key incidents, and streamlining arrivals and departures. By integrating keyless entry with accommodation management workflows, NZDF gains greater control, visibility, and responsiveness across the Defence estate, supporting both operational readiness and personnel experience.

Benefits to NZDF

1

IMPROVES SECURITY & REDUCES RISK – Eliminates lost or duplicated keys and enables controlled access.

2

SIMPLIFIES ARRIVALS & DEPARTURES – Removes physical key handover processes.

3

ENHANCES AUDITABILITY – Provides clear access logs for accountability.

4

INTEGRATES WITH ACCOMMODATION SYSTEMS – Aligns access with booking data.

5

IMPROVES PERSONNEL EXPERIENCE – Enables seamless, flexible entry at any time.
